FACSIMILE REQUEST & COVER SHEET

TO: Christina Purcell, NJDEP
FAX #: 609-633-1454
FROM: Sharon Jaffess
DATE: October 14, 1994
OF PAGES: 2 (including cover sheet)

COMMENTS:

Here's a draft of the memo on the Dayco RA Workplan/Stage 1B survey. I'll fax the final as soon as I get it.

346038

Subject: L.E. Carpenter Site (Dayco Corporation)
Cultural Resources Survey/RA Workplan

From: John Filippelli, Chief
Environmental Analysis Section

To: Janet Feldstein, Chief
Central New Jersey Section II

DRAFT

We have reviewed the draft Remedial Action Workplan for the L.E. Carpenter site to determine whether the proposed excavations in the remedial workplan will affect the areas of the site, which are sensitive for the discovery of cultural resources.

Three of the organic "hotspots" (1,2, and 6) will need more cultural resources survey, since the excavation at these spots will exceed the depths below which cultural resources can be expected to be found. (The critical depth for hotspots 1 and 2 is five feet; for hotspot 6, it is six feet). Accordingly, we recommend that an archeologist be present during the excavation at the specified hotspots, from the time the critical depth is reached till the end of the excavation.

In order to define the specific tasks to be performed by the archaeologist during the monitoring phase, we would suggest that a meeting or a conference call be arranged with the archaeologist, the RPM, and the appropriate remedial design personnel.

We look forward to setting up this meeting or conference call soon. If you have any questions, please call John Vetter, EPA Archaeologist, or Raymond P. Reyes at (212) 264-6713 or (212) 264-6719, respectively.
